

## STATEMENT OF PURPOSE

I am (**Student Name**) residing in Vadodara, Gujarat. I come from humble background, & state of Mahatma Gandhi where peace, love, care is main essence of living. Hence I love this country & carrying a vision to do something for my country in future, unfortunately country is still under development. In India when students look around for a place to study for an advanced degree, they find few top- quality programs.

In today's competitive globalised era if you want good position in society i.e. Good educational career, good job with handsome salary, and good financial status in society.

One requires a Good education which can make you career-ready for business organizations where the demand is basically focused on multi-talented individuals with all round qualifications in business, Finance, marketing, management to keep pace with the competition, therefore I have decided to prepare myself with advance expertise in latest branches of knowledge that can intensify & develop my aptitude further professionalism & earn me progressions of capabilities for career growth.

Therefore I decided to pursue my education by opting for a Masters in Administration Course from Bedfordshire University.

Starting off from my academics- I have completed my Senior Secondary Certification and Higher Secondary Certification both from Gujarat Board in the years 2010 and 2012 respectively. Thereafter I decided to pursue further education in the field of Electrical Engineering from Parul Institute of Engineering and Technology with 6.3 CGPA in year 2016.

To implement the theoretical knowledge into practical life and thus I started working Global Solar Energy as Solar Installation Engineer. I worked with for 7 months. To explore more in the same field I searched for a different job and started working with Gajanand Industries as Project Engineer since January 2018 till date.

There was always a desire to study in abroad. I was confused as to which country would be best suited to fulfil my dreams. Thus I started browsing the internet, attended various educational seminars, met with expert consultants for the appropriate country from which I could get the requisite degree. After certain amount of searching, I found UK to be the best suited in all aspects **like Quality education, fastest growing economy, highly reputed universities, well known British degree and more important it is I will get a benefit of cross culture.**

The University of Bedfordshire is home to 24,000 students out of which 3,000 are international students. Each year students are awarded scholarships and bursaries

to help fund and develop individuals. The university is always advancing and achieving recognition for its hard work. Within easy reach of London and right next to well-equipped towns the campuses offer a good balance of being small enough to be friendly with a good sense of community and close enough to bigger hubs of activity and entertainment in Bedford, Luton and London. University is one of the leading institutions nationally and worldwide offering a selective area of management courses taught from charismatic lecturers. I believe Master of Business Administration from this university would be able to pursue my career aspirations and my desire for this subject enable me to develop myself into future professional. I look forward to an interesting and rewarding association with your esteemed University.

There are no doubt, many reasons, why Indians are choosing to study abroad because lack of teaching pedagogy . Also the courses are not designed according to latest market standards. Even the assessment pattern is more a paper based exam rather than a one which involves more of practical. My country's educational institutions are limited and thus unable to match the diversity and multiculturalism available in foreign countries.

After completion of this course, I intend to come back to my home country with the outstanding skill set whereby I would be able to work as advertising director, corporate sales manager, executive manager, fundraising campaign manager to name a few in multinational companies thereby leading to a perfect growth in my career.

Hence, after completing my course I am confident that I will easily get a suitable job in leading organizations in India, where there is always a shortage of technical & skilled people.

Thus, my only goal is to be a successful and dynamic professional in near future which can make me stand out amongst all & also want to contribute to my parents financially and fulfil their dreams and aspirations. I am sure to achieve this as I firmly believe "Where there is a will there is a way."

I hope that you will find all my documents in proper order and I kindly request you to process my visa application as soon as possible. I am very much thankful to you for giving me your valuable time to process my student visa application.

**"The Degree of your success tomorrow depends on the Degree you get today"**
