

STATEMENT OF PURPOSE

'EDUCATION IS TICKET TO SUCCESS'

Following the captioned line I, **STUDENT'S NAME** have completed my BSC in Nursing from Saurashtra University in 2017. Since early days I always wanted to pursue my higher studies in international university so having the opportunity to fulfil my dreams see my future secure and bright I have decided to complete my further studies from international university.

My main motive to choose UK as a study destination is the atmosphere provided to the international student is very friendly and help the students feel like their own home country. The education provided to the student is recognised all across the globe and the student can make their career not only UK but different destinations of the world. The industrial placement helps the student to learn the modern techniques of the international market which would prove as an extra attribute to the student when he returns back to his motherland. The fees are quite affordable compare to other countries and it becomes easy for the student to learn the international modules which would be helpful in the Indian market.

Glasgow Caledonian University is the top modern university in Scotland by research power. GCU is regularly ranked as one of the UK's top 10 modern universities and is one of very few modern universities to rank among the top 50 universities in the UK in at least one of the national league tables. It is also the first and, so far, only modern Scottish university to rank among the top 400 universities the world. The University has had mixed reviews in UK-wide (national) league tables over the years, attributed by the Guardian to its firm accent on widening participation in higher education. A 2013 review by the UK's Higher Education Statistics Agency placed GCU as top in Glasgow, 2nd in Scotland, and 11th in the UK for employability among graduates. Also in 2013, the University was ranked 2nd in the UK for international student satisfaction. The university has been cited as one of the UK's most "dynamic and innovative" universities. GCU is the top performing modern university in Scotland for UK full-time students completing their first degree. According to the Higher Education Statistics Agency (HESA) UK Performance Indicators in Higher Education, GCU has a completion rate of 79.9 per cent, above the sector average of 79.5 per cent for Scotland. 95% of GCU graduates are in work or further student six months after graduation. The students association represents and enables Glasgow Caledonian University students to enhance all aspects of their student experience.

Delivered at Glasgow Caledonian University's London campus, this Global MBA programme has been designed around their commitment to this distinctive Global MBA programme is designed for enterprising and socially-minded individuals with aspirations to become a professional manager with an instinct for creating sustainable business in a socially responsible manner. I will learn how to lead from within through innovation and creative thinking, shaping me into a leader ready for tomorrow's world. Upon completion, I will be able to identify my own competency development needs in order to become a responsible leader of the future. A flexible MBA, this unique programme gives me the opportunity to specialise in their preferred area through a choice of nine unique elective modules. I can also graduate with an **MBA (Public Health)** if they choose the modules specific to that pathway. This practical and applied programme provides insight into the everyday challenges confronting managers within a range of business and third sector organisations across the globe. They emphasise the role, contribution and integration of the key business functions to enhance my ability to design and deliver effective organisation-wide strategies.

Thanks & Regards
